

Building Collaborative Agentic Workflows in Publishing

Anuchit Chalothorn

Technology Consultant

About Me

- **Technology Consultant @ Self-employed**
- **Former Tech Lead @ IoT and Digital Innovation Institute, depa**
- **Former Senior Software Engineer @ SIPA (Lead Developer Suriyan & Content writer ThaiOpenSource.org)**
- **Founder @ RedLine Software (Merged with Trilex Labs)**

The Self-Publishing Lifecycle

1. **Research & Ideation** – Finding market gaps and planning content
2. **Drafting & Outlining** – Structuring chapters and core ideas
3. **Writing & Ghostwriting** – Translating concepts into rich prose
4. **Design & Compilation** – Crafting layouts (e.g., EPUB, PDF)
5. **Distribution & Marketing** – Reaching readers via paperback and eBook stores

What the AI can do in authoring

1. Research
2. Brainstorming
3. Drafting
4. Extend your *plot*

Case Study: "The Lavendear Project"

- **The Challenge** – Polishing and writing a romance novel (NC 18+) from readAwrite.
- **The Solution** – Leveraging automated workflows for rewriting and polishing.
- **The Result** – Fluent, engaging, and highly stylized storytelling produced collaboratively with AI.

Plot

โนเอลตอบ "หิวมากเลย" แต่กระชับกอดให้แน่นขึ้นอีกนิด

"เอ๊... หิวหรือไม่หิวคะ" แนนถามหยอก

โนเอลตอบ "หิวแนนมากเลย"

Generative AI

โนเอลกระชับอ้อมกอดให้แน่นขึ้นอีกครั้ง "หิวมากเลย..."

"เอ้... หิวหรือไม่หิวคะ?" แนนถามอย่างขี้เล่น

โนเอลตอบด้วยน้ำเสียงกระซิบ "หิวแนน...มากกว่า"

Plot

ทอยถอนริมฝีปากออก กระซิบข้างหูเจน "ตื่นหรือยัง"

เจนหัวเราะคิกแล้วกระซิบตอบเบาๆ "ปลุกอีกหน่อยก็ได้นะ..."

Generative AI

ทอยถอนริมฝีปากออกช้าๆ ก่อนจะกระซิบข้างหูเธอ "ตื่นได้หรือยัง? หรืออยาก
ให้ปลุกอีก?"

เจนหัวเราะคิกก่อนจะชุกหน้ากับไหล่ของทอย แล้วกระซิบตอบเบาๆ "ปลุกอีก
หน่อยก็ได้ล่ะ..."

The Automation

- **Workflow Automation** – Seamlessly integrate services using platforms like n8n to orchestrate end-to-end processes.
- **Scalable Content Generation** – Leverage *AI-powered SaaS* tools to produce high-quality eBooks at scale, adapting tone and style on demand.

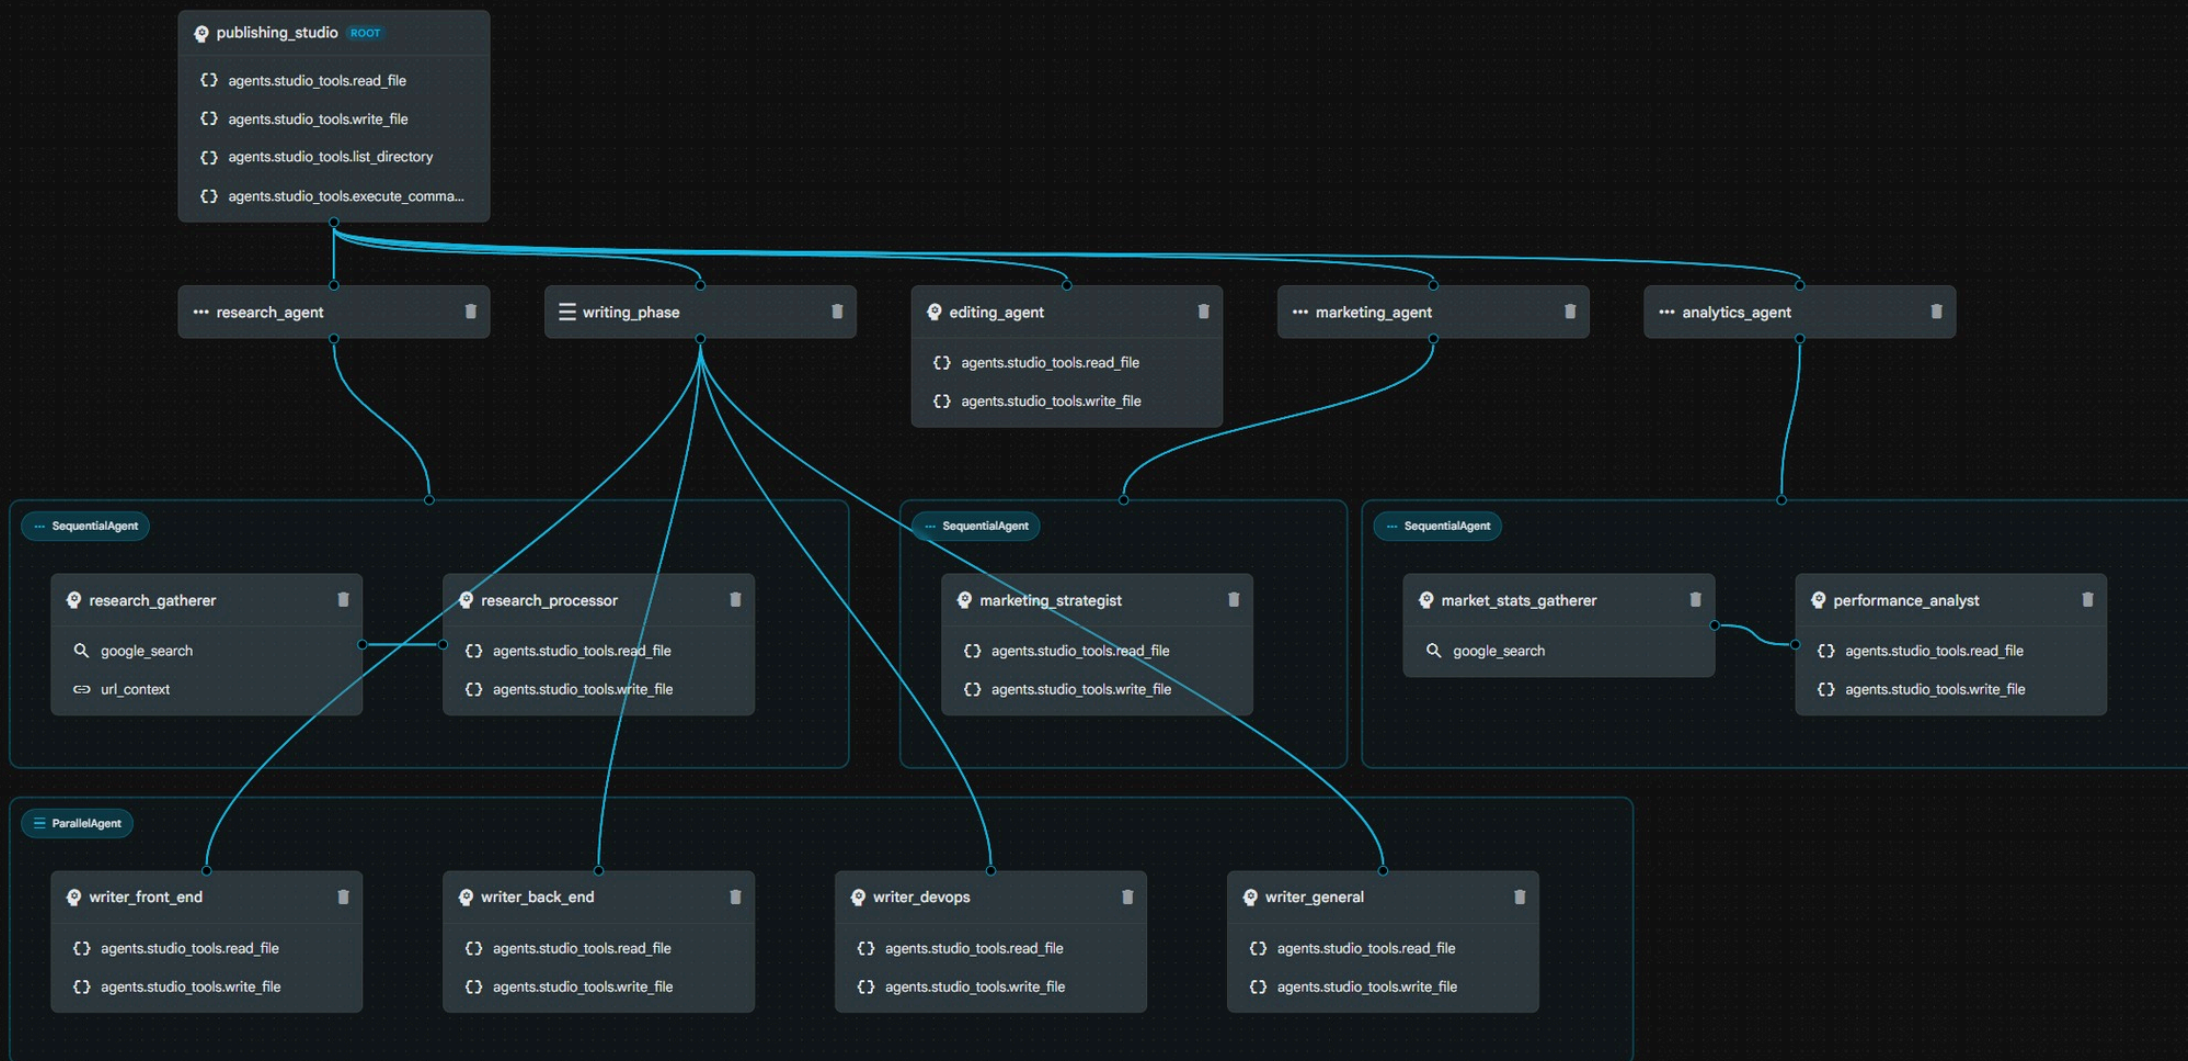

Agent

The basic agent components

Agent workflow

- Sequential
- Loop
- Parallel
- Combine to hierarchy

Publishing studio

- **Full Lifecycle:** "I want to publish a technical book about 'Building AI Agents with ADK'. Run the full studio lifecycle."
- **Research Only:** "Research the 'Rust for WebAssembly' market and generate a 10-chapter technical outline in research/outline.md."
- **Targeted Drafting:** "Based on the existing research/outline.md, draft Chapter 1 and Chapter 2 using the writing sub-agents."

Core Tooling

- **Plot/Draft** – Content in markdown format.
- **Compile** – Cookbook templates & auto EPUB/PDF generation.
- **Authoring** – Agent for research, drafting, and image creation.
- **Publishing** – Full agentic workspace covering research, writing, and marketing.

Human-AI Collaboration

- **Seamless Integration** – Embedding AI into standard writing workflows.
- **Iterative Drafting** – Collaborating on drafts to polish prose and style.
- **Continuous Feedback** – Keeping the human in control as the creative director.

Transformation

- **Authoring Tools** – Streamlined content refinement, note-taking, image generation, and marketing support.
- **Publishing Studio** – ADK-driven multi-agent platform that automates research, outlining, drafting, editing, marketing, and analytics.
- **Agent & Specialized Skills** – Modular sub-agents equipped with custom skills for dynamic task execution.
